ABOUT ME

Dedicated undergraduate student with strong organizational and time management skills. Proficient in basic computer applications and effective communication. Interested in gaining practical experience and contributing to team success through hard work and commitment.

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Web Technologies** : HTML
- **Databases** : MongoDB
- **Tools** : VS Code
- **Concepts** : Data Structures
- **Operating System** : Windows 11

CORE COMPETENCIES:

- Object Oriented Programming
- PROBLEM SOLVING

EXPERIENCE

Full Stack Developer Intern
EDU Tantr | Bengaluru, Karnataka, India
May 2025 – June 2025 (2 Months)

- Developed and deployed 3+ responsive full-stack web applications using HTML5, CSS3, JavaScript, Node.js, and Express.js.
- Built and integrated RESTful APIs to support dynamic frontend functionality and secure backend operations.
- Designed and optimized MySQL and MongoDB databases, schema design, CRUD operations, indexing, and query optimization.
- Improved API response time by 30% through performance tuning and database optimization.
- Identified and resolved 25+ application bugs, increasing system stability and reliability.
- Implemented authentication and authorization mechanisms to enhance application security.
- Participated in Agile sprint planning, stand-ups, and peer code reviews.
- Maintained version control using Git and GitHub for collaborative development.

PROJECT EXPERIENCE

Human Fitness Monitoring System using CNN

- Built a deep learning model using CNN to detect and classify human fitness activities.
- Used Python, TensorFlow, and OpenCV for real-time video analysis.
- Achieved 90%+ accuracy through dataset preprocessing and model tuning

PROJECT

Human Fitness Monitoring System using CNN

• Developed a real-time human activity detection system using Convolutional Neural Networks (CNN).
• Trained and tested the model using Python, TensorFlow, and OpenCV.
• Performed image preprocessing and data augmentation to improve model accuracy.
• Achieved 90%+ accuracy in classifying fitness activities.
• Built a CNN-based deep learning model to detect and classify human fitness activities.
• Used Python, TensorFlow, and OpenCV for training and real-time monitoring.
• Achieved high classification accuracy through model optimization.

Education

✓ **Bachelor of Science (B.Sc.) in Computer Science**

Government Arts College, Tirupattur,Tamilnadu
Affiliated to Thiruvalluvar University
Jul 2023 – Present (Expected Graduation: Apr 2026)

Relevant Coursework:

- Data Structures
- Web Development
- Database Systems
- Java, HTML, PHP

✓ **Certificates Course**

- Diploma in Computer Application

Certificates

- Internship Full stack development Certificate, Edu Tantr — May '25
- Oracle certified foundation associate, Oracle university — Aug '25
- Basic of Python, Infosys — Mar '25
- Explore Machine learning using python, Infosys — Mar '25
- Object Oriented programming using python, Infosys — Mar '25
- Introduction to MongoDB for Students, ICT ACADEMY — Aug '24
